

Astonishing report reveals a cutting-edge strategy that turns financial dreams into reality!

**What If You Could Work For Just 1-2 Years, Retire,
And Be Set For Life - With Money Coming In Month
After Month Like Clockwork...**

Without Ever Lifting Another Finger!

Sounds like a nice fantasy, doesn't it?

But... *what if* this wasn't just a fantasy?

What if you really COULD invest just 1 to 2 years of your life toward building a financial empire...an empire that will provide you with Passive Residual Income *for the rest of your life?*

What is "Passive Residual Income?"

It's money you earn over and over again from an action you took just one time.

Read on to discover how being a childcare worker with NO money, NO experience, and NO internet skills gave me an unfair advantage in making **\$22,527.33 in just 3 months** on the internet...

And why I'm convinced YOU can do the same!

Just turn the page to find out how...

Dear Frustrated Internet Marketer,

Passive residual income isn't just a pipedream...and I'm living proof.

I'm here to tell you...you really can invest just 1-2 years of your life to create a passive residual income that will last a lifetime. And you don't need to be a genius to do it. All you need is the *willingness to learn*, the *discipline to take consistent action*, and the *patience to allow your earnings to grow*.

No, I'm not talking about real estate, stocks and bonds, or network marketing. I'm talking about a specialized strategy for...

Building Affiliate Websites For Highly-Targeted Hungry Niche Markets!

While the concept isn't new, **the FORMULA I personally use to build my passive profits empire is very unique...and it works** (just ask my students!).

Okay, here's where I have to give you my compulsory legal disclaimer...

I am NOT guaranteeing you will have the same results as me. What I'm doing is sharing with you the results I've personally received, telling you how I achieved them, and showing you examples of what is possible if you get the same results. It's possible you won't make any money at all. However, I am a firm believer that action produces results, and feel (that's "feel" and not "guarantee") – as long as you take action – you will get results, even if they are smaller than what I share here in this report.

Whew! Now that the legal mumbo-jumbo is out of the way, here are the nuts and bolts of what I do. First of all...

I Don't Try To Make Millions Of Dollars From Just One Website...Instead, I Build Multiple Websites

My goal is to earn an average of \$10 per day from each website. I know that doesn't sound like a lot, but it can add up very quickly. Here's the math...

- ➔ If you build 10 websites, each earning \$10 per day...that adds up to \$100 a day – or \$3,000 a month – in profits.

Are you excited yet? Well, hold onto your seat, because you ain't seen nuthin' yet! **Here's the "Plan" that will allow you to retire after just 1 to 2 years...**

- ➔ If you build 1 website a week for a year – taking 2 weeks off for vacation – you'll have 50 websites built at the end of one year. If each website averages just \$10 per day...that adds up to \$15,000 a MONTH in profits!

And, remember...**this is completely PASSIVE income...**

**You Build A Website, You Walk Away,
And You Forget About It...You Don't Have To
Do Another Thing With That Website,
Except Deposit The Checks!**

Now, there are a few important points I need to make here:

1. I don't limit my websites to only \$10/day...some of my websites will make more and some will make less. But, I aim for \$10/day per site as my minimum financial goal.
2. **Using my model, you'll only need to work a year or two to be set for life!**
3. This is NOT a get-rich-quick scheme or a quick fix! It can take 2-4 months to see the money start trickling in (by trickle, I mean 21 cents or \$1 a month). When you see this trickle begin, you know the search engines have begun indexing your webpages.
4. It can take an additional 4-6 months to see the income build to a steady stream (to me, a steady stream is \$5-\$10/day per website). This happens as your webpages increase in the search engine rankings.
5. If you want to take a more active approach, there are things you can do to reduce the time it takes to begin earning profits.

What I want to stress MOST is this...

**If You're Patient And You Stick With The "Plan,"
Within Just 1 To 2 Years You'll Be Earning
A Very Generous PASSIVE Monthly Income
From Work You Did One Time**

...Without Ever Having To Lift Another Finger!

So, what's my formula for building these "walk-away websites?"

1. I build websites in a very specific way...a way that requires no upkeep from me at all. That means:

- NO tweaking for search engine optimization
- NO customer support
- NO adding and updating content
- NO advertising

My websites are built to attract visitors for FREE from the search engines. Once I've completed a website...I walk away, forget about it, and build another one.

2. Although I do use adsense on certain pages of my websites, I don't try to earn all my money from adsense. *My goal is to earn money every time someone clicks a link on my site.* To do that, I incorporate a minimum of 3 to 5 income strategies in every website I build. Here's an example of 3 income streams I might combine to monetize one website:

- An affiliate program
- An informational product
- Adsense advertisements

3. I offer a newsletter subscription at each website, and set up an autoresponder that contacts subscribers on a regular basis with special offers. This increases the number of first-time and repeat sales made by my visitors.
4. I include a TON of relevant content in each website. While everyone is so worried about the search engines de-listing their websites, I'm laughing all the way to the bank. Even my oldest sites that were very obviously built with page generating software are still listed in the search engines and earning money every month. Why? Because of the content on the site!

But, you haven't even heard the best part yet...

While most affiliate marketers spend 2 to 4 months to build this type of high-content website...

**Using My Specialized Formula, You Can Build
An Entire High-Content Niche Affiliate Website
From Start To Finish . . . In Just 8 Hours Or Less!**

How? By taking advantage of the new technology and automation that has recently become available.

Wait! Before you run out and try to do this on your own, you need to know...**there is a RIGHT way to use automation and a WRONG way.**

For instance...

If you plan to use software that automatically generates webpages, you never want to use the templates that come with the software. Instead, you want to create your own original templates...so you don't leave "tracks" the search engines can use to identify your site as being "just another site built by software X."

And, in case you're concerned, **here's the REAL SCOOP on the policies that determine "when" and "why" a website is de-listed by the search engines...**

As long as you create original templates, your website will not be banned for using automation to build your webpages. However, your website can (and will) be banned if it doesn't offer anything of real value to your visitors.

Sidenote: "Content is King!"

When the search engines look at your site, they ask this question:

"If all the links and advertisements that earn money are removed, is there anything left on that website that provides value to a visitor?"

If the answer is "yes," then your website is safe.

THAT's why it is so important to have a ton of relevant content on your site!

One Last Money-Making Tip Before I Go...

The internet is still in its infancy, and things change very quickly. When new technology emerges, or the search engines change their algorithms, I never look back.

As I mentioned earlier, NONE of my websites – no matter how old they are (and some are pretty old) – have been de-listed or stopped earning money.

I've found it's a waste of time to go back to old websites and tweak them for what's working best now...especially since what works best today may not be what works best tomorrow.

So, **I leave my old websites alone and let them do their job of putting money into my pocket every month**. And, I apply the most current technology and techniques to the new sites I build.
